

BS Biotechnology

This file has two sheets: 1) Performance Sheet 2) Rubric Calculator

Performance sheet will be used to provide information about University, department and program name only. No other field is available for user input.

Values will be autofilled in performance sheet. Values will be taken from second sheet.

To fill this Rubric Calculator, this is the only symbol you can use for this purpose 

Just copy this symbol and paste to rate any standard. The sub-score and total score will be calculated automatically.

If symbol is pasted in wrong cell then just either press CTRL + Z or copy the same rating scale to undo your rating.

For example, if you want to rate any standard as '5' but mistakenly you have pasted this symbol to '4' or any other scale, then

either press CTRL + Z or just copy-paste the same scale i.e. '4' or any other.

Comments:

The objectives and outcomes for BS Biotechnology degree program seem to be well-aligned with the goals of such a program. However, the program outcomes could be improved by including a focus on critical thinking, problem-solving, communication skills, lifelong learning, interdisciplinary collaboration, and providing more concrete measures of success. The program is running well with well-structured curriculum and competent faculty. Encouraging faculty to pursue their education and professional development is crucial for ensuring that they remain up-to-date with the latest research and trends in their fields, which can ultimately benefit both students and the institution. Offering alumni mentorship is an excellent way for an open/virtual/distance learning university to improve program success by providing students with valuable guidance and support as they navigate their careers.
